

$$\frac{2}{\sqrt{2}} \frac{\sqrt{2}}{2} = \frac{2\sqrt{2}}{2} = \sqrt{2}$$

$$\text{Brillouin Zone: } -\frac{\pi}{a} \leq k \leq \frac{\pi}{a}$$

Homework #2

reciprocal lattice vectors, reciprocal crystal, Brillouin zone.

lattice: $a_1 = 1.2 \mu\text{m} \hat{x}$
 $a_2 = 1.2 \mu\text{m} \hat{y}$

reciprocal vectors $b_1 = \frac{2\pi}{1.2 \mu\text{m}} \cdot \frac{\frac{5}{3}\pi}{\mu\text{m}} \hat{x}$

reciprocal crystal

$b_2 = \frac{5}{2} \pi \mu\text{m}^{-1} \hat{y}$

$b_1 = \frac{2\pi}{1.2 \mu\text{m}}$

$b_2 = \frac{2\pi}{1.2 \mu\text{m}}$

$b_2 = \frac{2\pi}{1.2 \mu\text{m}} \hat{y}$

irreducible Brillouin Zone

(11)

$q = \Gamma_2 \hat{x} + \Gamma_2 \hat{y}$

lattice vectors

$a_1 = \Gamma_2 \hat{x}$

$a_2 = \Gamma_2 \hat{y}$

$\frac{2\pi^2 + 2\pi^2}{4\pi^2} = 1$

reciprocal:

$b_1 = \frac{2\pi}{\Gamma_2} \hat{x} = \frac{\pi \Gamma_2}{\Gamma_2} \hat{x}$

$b_2 = \frac{2\pi}{\Gamma_2} \hat{y} = \frac{\pi \Gamma_2}{\Gamma_2} \hat{y}$

$b = 2\pi \mu\text{m}^{-1}$

1.B.Z

$\frac{\pi^2 2 + \pi^2 2}{4\pi^2} = 1$
